

NRC FORM 7 (6-2006) 10 CFR 110		U.S. NUCLEAR REGULATORY COMMISSION APPROVED BY OMB: NO. 3150-0027 EXPIRES: 06/30/2009 Estimated burden per response to comply with this mandatory collection request: 2.4 hours. This submittal is reviewed to ensure that the applicable statutory, regulatory, and policy considerations are satisfied. Send comments regarding burden estimate to the Records and FOIA/Privacy Services Branch (T-5 F52), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to infocollects@nrc.gov , and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0027), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.							
APPLICATION FOR NRC EXPORT/IMPORT LICENSE, AMENDMENT, OR RENEWAL <i>(See Instructions on Page 5)</i>									
PART A: FOR NRC USE ONLY		<input type="checkbox"/> PUBLIC OR <input type="checkbox"/> NON-PUBLIC							
LICENSE NUMBER <div style="font-size: 1.5em; font-family: cursive;">CBP56-1</div>	DOCKET NUMBER	DATE RECEIVED							
PART B. TO BE COMPLETED FOR ALL LICENSES, AMENDMENTS, OR RENEWALS (If more space is needed to complete any of the items, use Pages 3-4 first, and then attach additional sheets, if necessary.)

ADDITIONAL INFORMATION (Reference applicable block numbers from page 1 and/or page 2 for each entry)

Blocks 2: License CBP005b had expired prior to completion of the intended export due to unforeseen circumstances.

International Isotopes Inc. acknowledges that this request for renewal contradicts the requirement set forth in Title 10 CFR 110.51 (b) which states an expired license may not be renewed. However due to circumstances outside of the licensee's control, International Isotopes Inc. requests relief of this regulation. These circumstances are summarized below:

Original Notification of Export and RAMQC Shipment submitted to NRC Operations Center and State of Texas on 10/20/06 indicated an intended Export Date of November 2, 2006. Between the period of 10/20/06 and 11/2/06 International Isotopes Inc. was informed that the Mexican government placed a hold on the Ultimate Foreign Consignee's import authorization by rescinding Dr. Manuel Clemente Riebling Newton's Federal Importer Number. NRC Operations Center as well as the State of Texas was informed that the export was delayed until 11/13/06. The export was again delayed for the same reason and rescheduled for 11/21/06 in the hopes that the import authorization would be reinstated by this time. International Isotopes Inc. did not seek an extension to the license at this time because there was no confirmation that the import authorization would have been reissued by December 22, 2006, the date that coincided with the Ultimate Foreign Consignee's import expiration date. On November 28, 2006, International Isotopes Inc. was informed that Mexican Customs confirmed the reinstatement of the Ultimate Foreign Consignee's Federal Importer Number. Unfortunately, International Isotopes Inc.'s specific export license had expired on November 22, 2006.

Block 4: An intended first shipment date of December 20, 2006 is two days earlier than the current Import and Export Authorizations Expiration date of December 22, 2006. The Co-60 source we intend to export has been manufactured in accordance with Sealed Source and Device Safety Evaluation NR-1235-S-101-S. The source is currently staged at Southwest Research Institute, San Antonio Texas and is intended to cross the border in Laredo TX. Given the close proximity of the staging area and border crossing we are confident that the export could be accomplished within a single day. Our goal would be to conduct the export on December 20, 2006, if License CBP0005b can be revised and reinstated in time. Also note that the domestic portion of the export between Southwest Research Institute and the Border crossing in Laredo, TX must comply with NRC Order EA-05-006. Notifications have been made in accordance with this Order based on the original exportation date. The required notifications will be reissued as soon as we can confirm the ability to proceed with the export. Because this date is less than 30 days from the date of this application, International Isotopes Inc. requests relief from the 30 day public notice requirement prior to a license being issued.

Blocks 5 and 6: International Isotopes Inc. requests to renew this license and to extending the expiration date to December 22, 2007. This December 22, 2007 date is one year later than the expiration dates associated with Import and Export Authorizations issued to the Ultimate Foreign Consignee listed in Block 9 above. Based on the difficulty we have experienced in coordinating this export International Isotopes Inc. would want to extend the expiration date for as long as reasonably possible and acceptable by both the United States and Mexican Authorities.
